

DELISPORT

NACTIS FLAVOURS, SUPPLIER OF TASTE

Nactis Flavours creates taste and functional tailor-made solutions everywhere in the world. In partnership with our customers, we contribute to their success with the quality of our products, our service oriented culture and our flexibility.

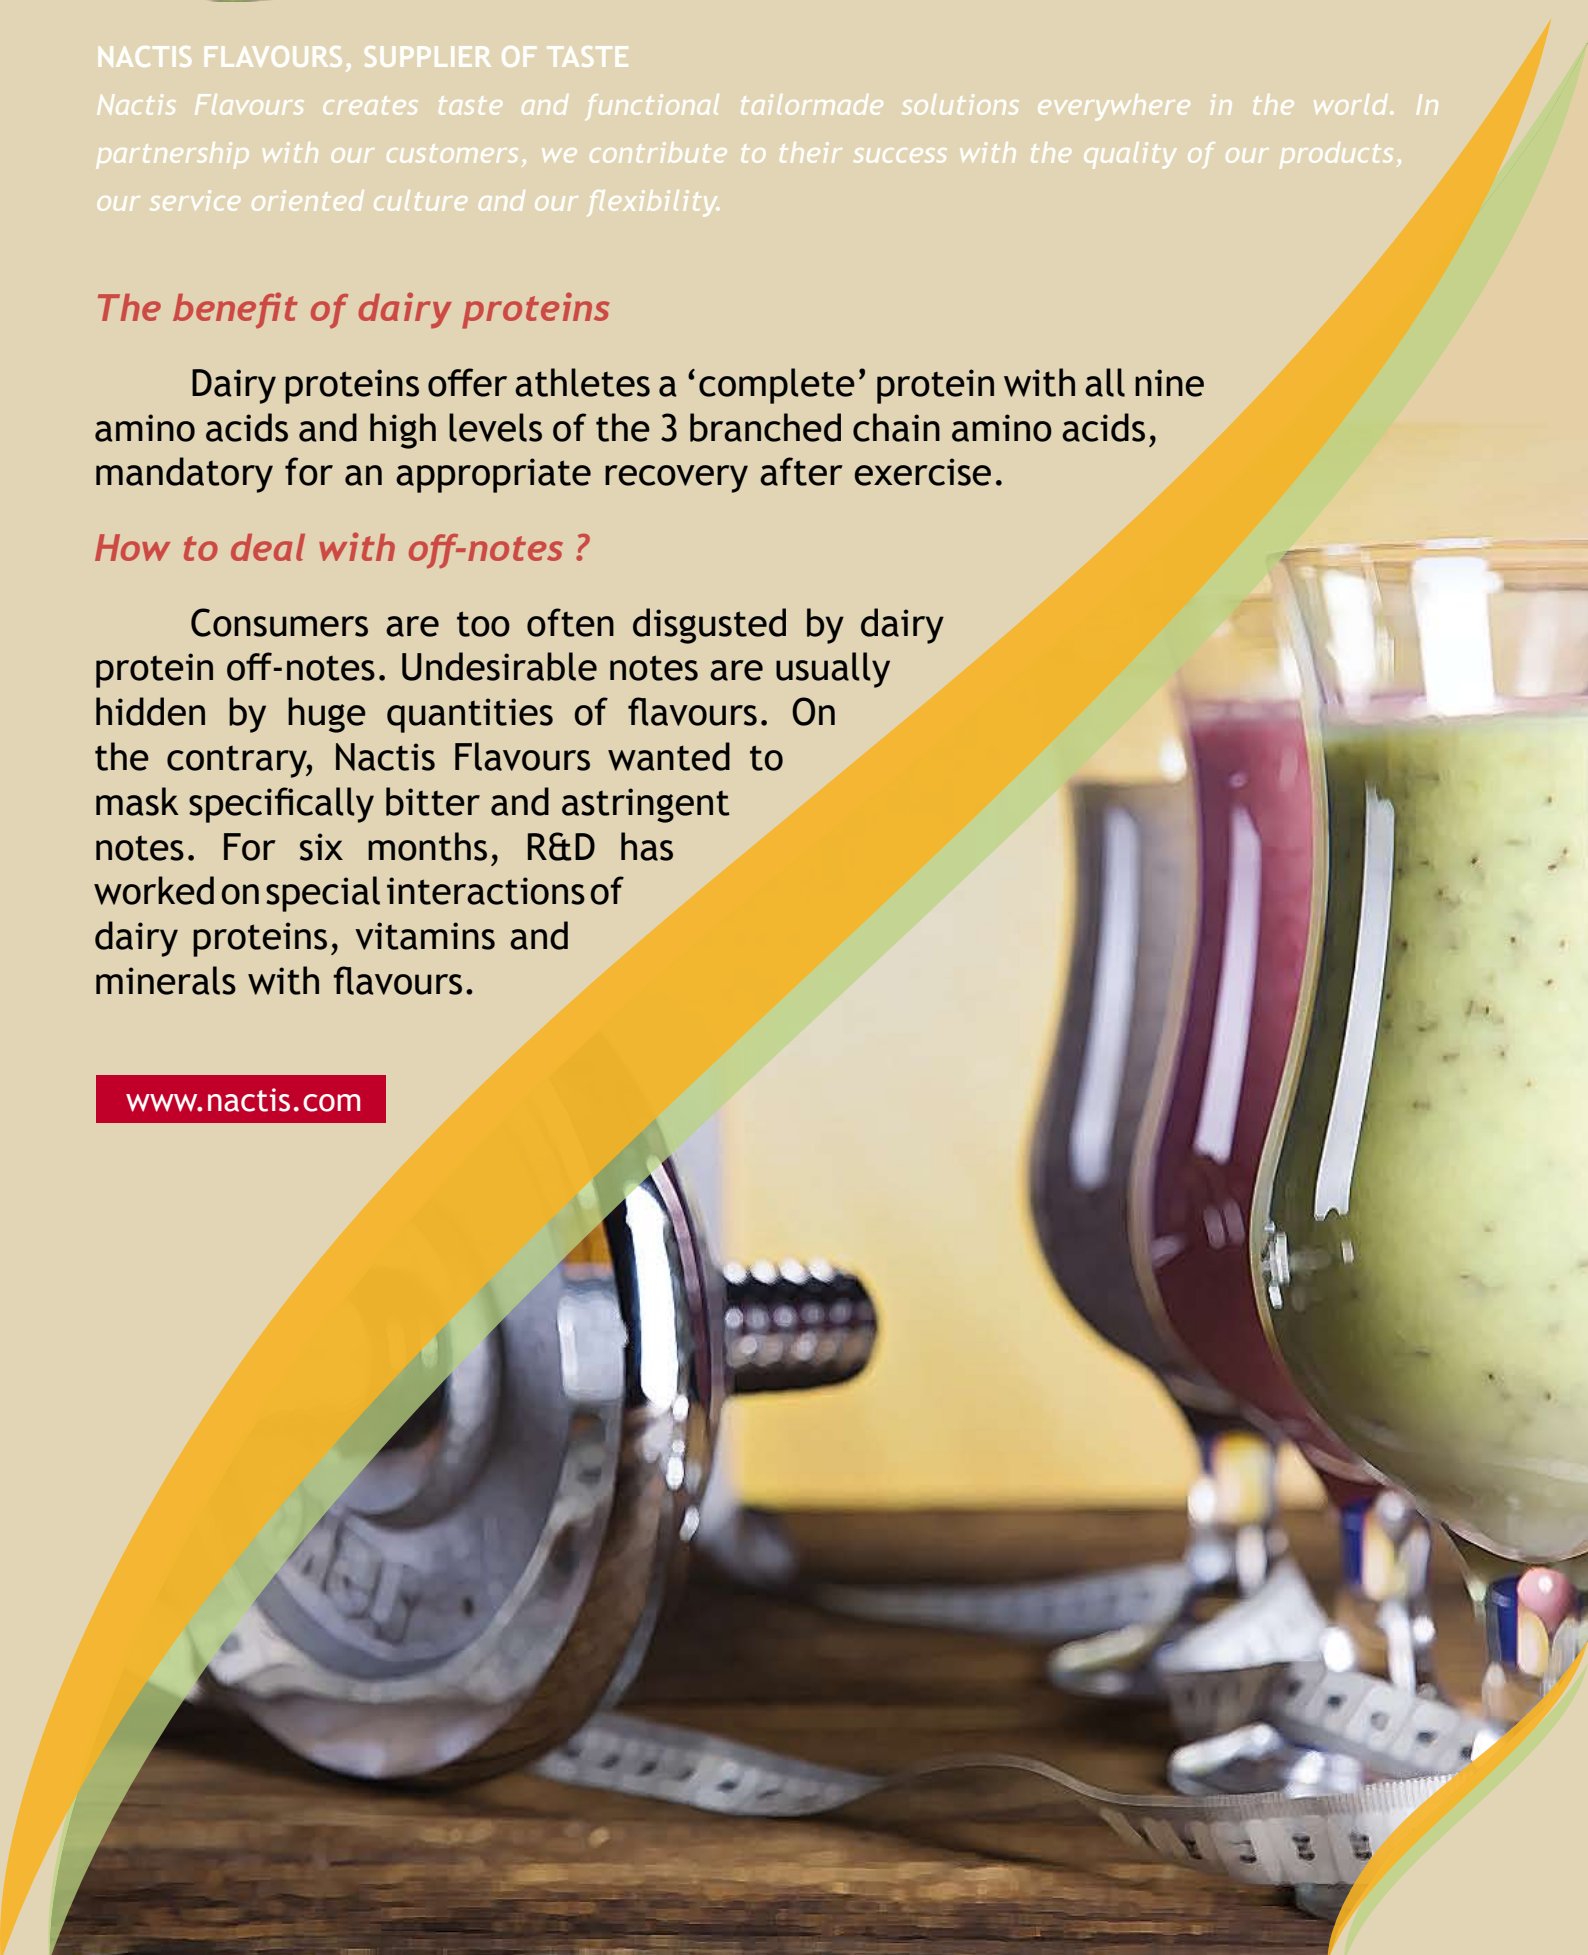

The benefit of dairy proteins

Dairy proteins offer athletes a ‘complete’ protein with all nine amino acids and high levels of the 3 branched chain amino acids, mandatory for an appropriate recovery after exercise.

How to deal with off-notes ?

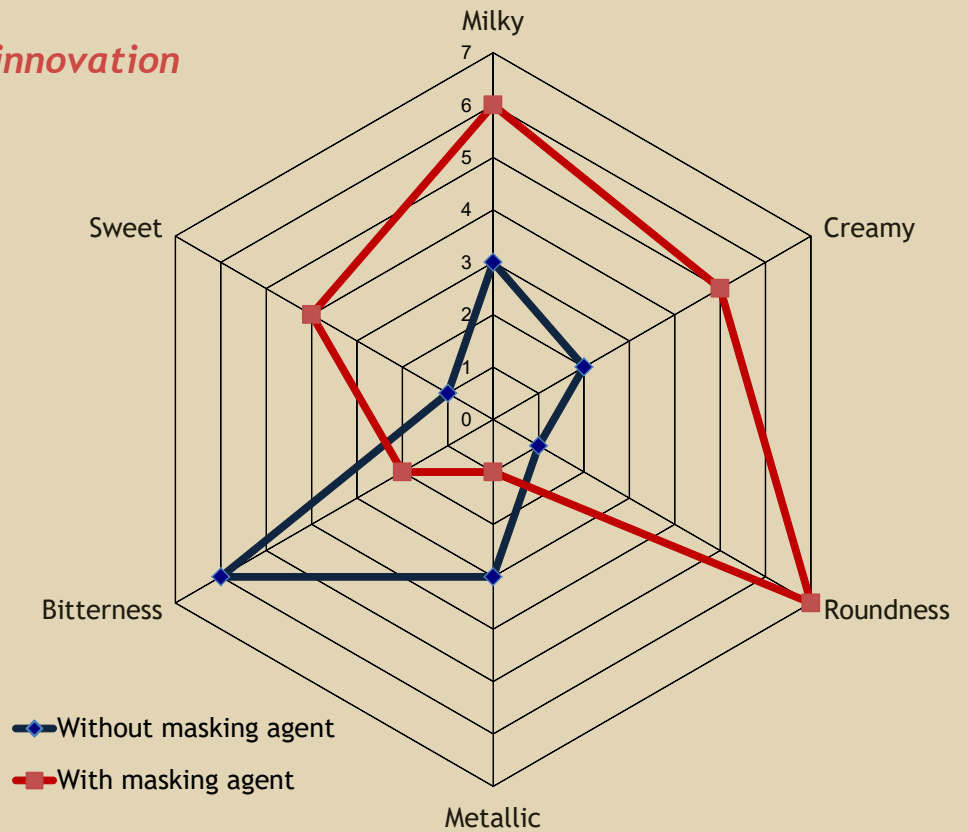

Consumers are too often disgusted by dairy protein off-notes. Undesirable notes are usually hidden by huge quantities of flavours. On the contrary, Nactis Flavours wanted to mask specifically bitter and astringent notes. For six months, R&D has worked on special interactions of dairy proteins, vitamins and minerals with flavours.

The taste of innovation

Our **DELISPORT** range offers to combine performance and great taste. By masking off-notes, these **innovative functional flavours** let us offer new tastes: cereal notes as traditional butter biscuits, muesli and fruity notes as banana-coco.

New taste examples

Cereals and brown notes

Muesli - cereal bar with apple

Biscuit - traditional butter biscuit

Corn flake - corn cereal and caramel

and also: chocolate, vanilla...

Fruity notes

Blueberry - red fruit yoghurt

Banana and coco fruit - sweet banana note with a dairy coco tone

and also: strawberry, raspberry, orange, red fruits...

info@nactis.com

<<Innovation is driven by demand of new flavours. Consumers are not any more satisfied with a chocolate or a strawberry taste. They want great and luxury tastings.>>
