

Vegan line

nactis
flavours

A select range of flavours and aromatic ingredients for tasty vegan and vegetarian applications.

Even if meat is still very popular, plant-based proteins are gaining consumers' favour. They want to diversify their diet or even exclude products of animal origin.

«Plant-based proteins» are excellent meat replacers for people who want to avoid real meat or products from animal origin for nutritional, ethical or religious reasons. Today's main challenge is to offer the consumer a **memorable sensory experience**, especially in terms of aspect, colour, texture and obviously of flavour.

Nactis Flavours offers an outstanding range of **aromatic and functional ingredients** to formulate all types of vegan products; meat alternatives, but also ready meals, sauces and so on. In function of your requirements, you can choose to bring meaty or seafood/crustacean characters to your product or to pronounce typical vegetable notes.

Intensify the sensory experience with decorative seasonings or marinades for more appealing products.

Functional Ingredients

Marinades

Marinades

By making use of the latest developments in carrier- and texturizing technologies combined with the extensive expertise in culinary flavours, Nactis can offer you a new range of marinades.

The new range is presented in both powder and liquid form. For the liquid versions, you are able to select water and oil based carriers.

Decor Seasonings

Nactis Flavours offers a variety of dry decorative toppings, which are rich in attractive and flavoursome visual marker herbs and spices. The products present excellent coating properties and ensure a flattering visual effect to seasoned products.
