

Nactarome Announces the Creation of Nactarome North Africa

Nactarome, a fast-growing European developer and manufacturer of natural flavour, taste and colour solutions, today announces the signing of a joint venture leading to the creation of Nactarome North Africa.

This new entity has been established to support key stakeholders in the Algerian agri-food sector by offering locally produced, high-quality flavours and ingredients. It is fully aligned with a broader ambition to contribute to the development of national excellence in the field of flavour creation, while leveraging the recognised expertise and technical know-how of the Group's European specialists.

Nactarome North Africa is now fully operational, ready to respond to the needs of Algerian companies and to accompany them in their innovation journeys. The launch of local flavour production is scheduled for September 2026, with the industrial facility currently in its final phases of completion.

The company also places strong emphasis on the valorisation of local resources, including dates, carob and citrus fruits. By combining these raw materials rooted in Algerian terroirs with its advanced flavour expertise, Nactarome North Africa aims to deliver solutions that are both authentic and innovative, while actively contributing to the promotion of the country's rich agricultural heritage.

Nactarome North Africa will be exhibiting at Djazagro, from 12 to 15 April 2026, offering industry professionals the opportunity to discover its expertise, innovative solutions and tailored support capabilities.

Through this initiative, Nactarome reaffirms its ambition to enhance the agility and competitiveness of Algerian businesses, by facilitating access to high-quality ingredients that underpin innovation, sustainable growth and long-term value creation.
